

ECHA proposes 15 substances for authorisation

Helsinki, 2 July 2015

Annex to the press release ECHA/PR/15/11

More information about the recommended substances:

The recommended substances, including examples of their uses in the scope of authorisation, are:

#	Substance name (and SVHC property)	Examples of uses in the scope of authorisation (examples) ¹
1	1-bromopropane (n-propyl bromide) (toxic for reproduction)	Solvent for vapour degreasing and surface cleaning
2	Diisopentylphthalate (toxic for reproduction)	Plasticiser
3	1,2-Benzenedicarboxylic acid, di-C6-8-branched alkyl esters, C7-rich (toxic for reproduction)	Plasticiser
4	1,2-Benzenedicarboxylic acid, di-C7-11-branched and linear alkyl esters (toxic for reproduction)	Plasticiser
5	1,2-Benzenedicarboxylic acid, dipentylester, branched and linear (toxic for reproduction)	Plasticiser
6	Bis(2-methoxyethyl) phthalate (toxic for reproduction)	Plasticiser

¹ There are non-registered substances that have been recommended because they could potentially replace other substances recommended or already included in Annex XIV. The examples of uses for these substances might refer to past uses or to uses that could take place due to structural similarities.

7	Dipentyl phthalate (DPP) (toxic for reproduction)	Plasticiser
8	N-pentyl-isopentylphthalate (toxic for reproduction)	Plasticiser
9	Anthracene oil (carcinogenic ² , PBT, vPvB)	Use in coatings, paints, waterproofing materials, sealants.
10	Pitch, coal tar, high temp. (carcinogenic, PBT, vPvB)	Anti-corrosion agent in coatings, paints, adhesives and sealants. Binding agent for clay pigeons.
11	4-Nonylphenol, branched and linear, ethoxylated ³ (equivalent level of concern due to endocrine disrupting properties)	Floating agent in mining. Use in paints and in emulsion polymerisation.
12	Boric acid (toxic for reproduction)	Cellulose insulation, metallurgy, adhesives, construction materials, coatings, detergents, refractories, fertilisers.
13	Disodium tetraborate, anhydrous (toxic for reproduction)	Cellulose insulation, metallurgy, adhesives, construction materials, coatings, detergents, refractories.
14	Diboron trioxide (toxic for reproduction)	Cellulose insulation, metallurgy, adhesives, construction materials, coatings, detergents, refractories.
15	Tetraboron disodium heptaoxide, hydrate (toxic for reproduction)	Cellulose insulation, metallurgy, adhesives, construction materials, coatings, detergents, refractories.

² Does not meet the criteria for identification as a carcinogen if it contains < 0.005 % (w/w) benzo[a]pyrene (EINECS No 200-028-5)

³ The full name of this Candidate List entry, including clarification on which substances are covered and some supporting information, can be found on the Candidate List.
