

## **ECHA proposal to the Member States:**

### **Draft Community Rolling Action Plan (CoRAP) update for years 2014-2016**

The draft plan is an annual update of the current CoRAP 2013 – 2015 and covers the next subsequent years 2014-2016. It contains substances for which there is a suspicion that their use could pose a risk to human health or the environment. Substance evaluation is the process under REACH Regulation (EC) No 1907/2006 (Articles 44 to 48) that allows for clarification of such potential risks.

This draft plan introduces 125 substances that are proposed for Member States (MS) to review under the substance evaluation process. It contains 56 substances newly allocated to the MSs and 69 substances already included in the CoRAP update published on 20 March 2013. The substances are tentatively divided for evaluation in years 2014, 2015 and 2016. At this stage it includes the non-confidential substance names, CAS- and EC-numbers and the contact details of the MS who intends to conduct the substance evaluation.

This draft plan has been prepared in close cooperation with the MSs, taking into account the criteria for selection of substances<sup>1</sup>. The MSs have also proposed substances based on national priorities. In many cases the initial concerns are related to PBT<sup>2</sup>-properties, suspected endocrine disruption, or carcinogenic, mutagenic and reprotoxic properties in combination with wide dispersive use or consumer uses. In general, the uses of these substances cover various areas and are not limited to particular industrial, professional or consumer uses.

The draft plan has been submitted on 24 October 2013 to the Member State Competent Authorities and the ECHA Member State Committee. The Committee will prepare an opinion on the draft CoRAP update in February 2014. On the basis of the Committee's opinion ECHA will adopt by the end of March 2014 the final CoRAP update for years 2014-2016. The final CoRAP update for years 2014-2016 will also indicate a justification document for each individual substance.

By publishing this draft now ECHA wishes to inform the stakeholders of the progress made and to facilitate early communication between the involved registrants and the relevant evaluating Member State.

---

<sup>1</sup> Selection criteria to prioritise substances for Substance Evaluation (2011 CoRAP selection criteria)
