

Draft Community Rolling Action Plan (CoRAP) update for years 2019-2021

The draft plan is an annual update of the current CoRAP 2018–2020 and covers the next subsequent years 2019-2021. It contains substances suspected of posing a risk to human health or the environment. Substance evaluation is the process under REACH Regulation (EC) No 1907/2006 (Articles 44 to 48) that allows for clarification of such potential risks.

The draft list contains altogether 107 entries. Of these, 96 substances are divided for evaluation in 2019, 2020 and 2021, 28 being currently planned for evaluation in 2019.

The list contains 20 substances newly allocated to the Member States (MSs). From the 87 substances currently included in the CoRAP update published on 20 March 2018, the respective MS identified 11 for withdrawing as, based on new information or changes of circumstances, evaluation is seen as low priority or unnecessary.

At this stage the list includes the non-confidential substance names, CAS- and EC-numbers, the initial grounds for concern and the contact details of the MS who intends to conduct the substance evaluation. The groups of structurally similar substances to be evaluated together are identified in an extra column and further described in the footnotes indicated in the EC-number column.

This draft plan has been prepared in close cooperation with the MSs, taking into account the criteria for selection of substances¹. The MSs have also proposed substances based on national priorities. In many cases the initial concerns are related to PBT²-properties, suspected endocrine disruption, or carcinogenic, mutagenic and reprotoxic properties in combination with wide dispersive use or consumer uses. In general, the uses of these substances cover various areas and are not limited to particular industrial, professional or consumer uses. To assure a consistent approach in evaluation of structurally similar substances, the substance evaluation process for identified structural similar substances will be preferably performed by one MS in one evaluation year. In case two or more MSs will evaluate the group of substances they shall collaborate to assure consistent approach in evaluation process.

The draft plan has been submitted on 27 September 2018 to the Member State Competent Authorities and the ECHA Member State Committee. The Committee is expected to give its opinion on the draft CoRAP update in February 2019. On the basis of the Committee's opinion ECHA will, by the end of March 2019, adopt the final CoRAP update for 2019-2021. The final

¹ Selection criteria to prioritise substances for Substance Evaluation (2011 CoRAP selection criteria)

http://echa.europa.eu/doc/reach/evaluation/background_doc_criteria_ed_32_2011.pdf

² PBT: Persistent, Bioaccumulative and Toxic

CoRAP update 2019-2021 will also indicate a justification document for each individual substance.

By publishing this draft now ECHA wishes to inform the stakeholders of the progress made and to facilitate early communication between the involved registrants and the relevant evaluating Member State.

Public version of the draft Community Rolling Action Plan submitted to the Member State Competent Authorities and the Member State Committee

10 October 2018
