Summary

In accordance with Article 10, paragraph 1 of Regulation (EU) No 649/2012 (the PIC Regulation), exporters and importers are required to inform their Designated National Authorities (DNAs) about trade in PIC Annex I chemicals in the preceding year, by 31 March of each year.

In accordance with Article 10, paragraph 3 and Annex III of the PIC Regulation, each EU Member State should then provide ECHA with aggregated information so that ECHA can summarise the data at Union level and make publicly available the non-confidential information.

This report summarises the trade activity of chemicals listed in Annex I of the PIC Regulation, in 2020, based on the data received from the Member States and the United Kingdom (Northern Ireland).

Note: The "Destination Region(s)" are provided in accordance with the codes for the United Nations Regional Groups: AF (African Group), AP (Asia and Pacific), CEE (Central and Eastern European Countries), WEOG (Western European and Others Group), GRULAC (Group of Latin America and Caribbean Countries).

1. Export of chemicals

22 Member States (Austria, Belgium, Bulgaria, Croatia, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Netherlands, Poland, Portugal, Romania, Slovenia, Spain and Sweden) reported trade activities and submitted data about exports in 2020 of PIC Annex I chemicals.

5 Member States (Cyprus, Estonia, Luxembourg, Malta and Slovakia) and United Kingdom (Northern Ireland) reported that no chemicals were exported.

501 exporters provided data. On the basis of this information, the non-confidential summary of the data on exports is available in tables 1 and 2. Table 1 provides a more detailed breakdown of the data whereas table 2 presents an aggregated view by Annex I entry.

After for two years in a row of decrease, the total amount of exported PIC chemicals has increased with 8% in 2020, from ~619 000 tonnes exported in 2019 to ~667 000 tonnes reported for 2020. Ethylene dichloride has remained the most exported chemical, with another increase of 47% of its exports, following the already reported increase of 31% in 2019 compared to the previous year.

2. Import of chemicals

20 Member States (Austria, Belgium, Bulgaria, Czech Republic, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Netherlands, Poland, Portugal, Romania, Slovenia, Spain, Sweden) reported imports of PIC Annex I chemicals in 2020.

7 Member States (Croatia, Cyprus, Denmark, Estonia, Luxembourg, Malta and Slovakia) and United Kingdom (Northern Ireland) reported that no chemicals were imported.

137 importers provided data. On the basis of this information, the non-confidential summary of the data on imports is available in tables 3 and 4. Please note that, as far less data on imports is available compared to exports, information must be further aggregated in order to avoid disclosure of confidential information.

The top three most imported PIC chemicals in 2020 have remained the same as in the previous year (Benzene, Ethylene dichloride and Lead compounds). Benzene represents 81% of the total imported PIC chemicals in 2020, despite a decrease of 18% compared with the previous year. Overall, the total amount of imported PIC chemicals in 2020 was of ~400 000 tonnes which represents a 20% decrease if compared with 2019.
